ABOUT ME

Senior Software Developer and aspiring Staff/Architect. Self-educated and programming since 2006. Most experienced in Web Platform and Front End development but also competent and interested in Back End or Full Stack roles. Current stack: Typescript, React, Node

EXPERIENCE

Front End Developer   *Remote*
AvenueCode   *Sept 2022 - Jun 2024*

- Gerdau Sales platform.
- Key achievements: Finished migration from legacy AngularJS to Next.js/React / Improved decoupling and performance moving out from a big monolithic Redux store into independent Contexts where possible / Introduced Typescript improving developer experience and early error detection / Replaced Boostrap-based custom framework no longer worth mantaining with TailwindCSS
- Tools: Typescript, Next.js, React, Redux, react-hook-form, Figma, TailwindCSS, GitLab CI

Front End Developer   *Remote*
WhitePrompt   *Jul 2021 - Dec 2021*

- Implemented features and user interfaces using custom Material-UI themes in React apps

Front End Developer   *Remote*
BairesDev   *May 2019 - Dec 2020*

- Developed first version of Modzy app that was launched to production. Implement and maintain features. Unit testing. Onboarding and mentoring new team members.
- Tools: React, Redux, Redux-Toolkit, Sass, Material-UI, Formik, Storybook, Jest, AWS S3
- Also participated as Full Stack Engineer in real state project using Svelte, Node and PostgreSQL

Full Stack Developer   *Mar del Plata, Argentina*
QuadionTech   *May 2017 - Aug 2018*

- Bugfixing and new feature implementation for Private Equity Suite. Projects: CRM, Reports
- Tools: AngularJS, KendoUI, C#, .NET Core, Entity Framework, SQL Server, RabbitMQ

Front End Developer   *Mar del Plata, Argentina*
Globant   *Sep 2014 - Oct 2016*

- Airline homepage core app (booking box), Flight Status app
- Custom implementation of 2-way binding and component hydration not provided by available framework and tools
- Tools: Backbone.js, Marionette, Handlebars, Underscore.js, Sass, REST APIs

Full Stack Developer   *Mar del Plata, Argentina*
Izus Studio   *Apr 2011 - Oct 2013*

- Building and maintaining web sites and apps. Solo developer in charge of the full web apps pipeline, from markup to deploy, including maintenance, database design & implementation.
- Tools: LAMP stack, CakePHP, jQuery, AngularJS, Bootstrap CSS, MySQL

SKILLS

Skills: JavaScript, Typescript, React, Node, Unit Testing, Git, Docker, Linux, SCRUM, Agile

(See also this gist where I showcase coding exercises and challenges)

Languages: English (C1 Level), Spanish (Native)
